SUMMARY

Full-Stack web developer entering the workforce. Earned a certificate in full-stack web development from the University of Utah bootcamp course. Very adaptive as a developer, with a strong growth mindset. After working on and managing several Full-Stack web applications, I have developed fantastic communication and teamwork skills, as well as knowledge in project management.

TECHNICAL SKILLS

Software Languages: JavaScript, CSS, HTML

Development Tools: React, Bootstrap, Mongoose, Handlebars, Node, Express

Backend Management Tools: Apollo, MongoDB, MySQL

PROJECTS

Caption-This | <https://github.com/Greeny467/caption-this> | <https://caption-this-production.up.railway.app/>

- A social media app where users post pictures, and come up with their own captions for other peoples images, before voting on which captions best suit the Image
- My Responsibilities: Backend Management, React component construction, Image handling, website logic
- Tools/Languages: JS, SCSS, HTML, React, MongoDB, mongoose, Apollo, Node, Express, ImgurAPI

Terse | https://github.com/Greeny467/terse_social_media | (No current deployment)

- A group messaging app in which users can only message each other in single words. This project boasts rudimentary messaging abilities without use of websockets.
- My Responsibilities: Backend Management, Handlebars pages, word limitation, Messaging, User systems.
- Tools/Languages: JS, CSS, HTML, Handlebars, MySQL, RapidAPI dictionary API, REST API routing.

Date-Planner | <https://github.com/Greeny467/date-planning-project-website> | <https://greeny467.github.io/date-planning-project-website>

- A simple website to help you plan your next date. Basic website using multiple API's.
- My Responsibilities: Majority of JS functionality, API usage, HTML setup
- Tools/Languages: JS, CSS, HTML, BoredAPI, A geocoding API

EXPERIENCE
